

Bridge Attribution-Based Layer Screening on BLIP2-OPT-2.7B

Pilot Sample

Prompt: What is the name of this bridge?
Entity: Chikugo River Lift Bridge
Predicted token: '\n'
Visual token span: 0-31
Tracked text pos: 44
Pilot size: 4 bridge samples

BLIP2 pilot4 shows a mixed visual-sensitivity pattern: early layers 2-5 remain important, layer 15 emerges as a strong attention-mediated bridge, and target-word writing shifts toward late MLP layers around 29-31.
